

Teaching Youth Social Action through Information Communication Technology

Technology reduces the cost of doing much of the work. The lower production price helps increase the profit margin, essential in eradicating poverty. Technology opens up doors for new opportunities to do business or profession. In turn, it increases the household incomes among the poor population.

The UNCRC consists of 54 articles that state children's rights and how governments should work together to make them available to all children. Under the terms of the convention, governments must meet children's basic needs and help them reach their full potential. Central to this is the acknowledgement that every child has basic fundamental rights. These include the right to:

An education that enables children to fulfil their potential

10 THINGS TO KNOW ABOUT POVERTY AND TECHNOLOGY 12th December 2018

However, only some have access to technology: Around 2 million UK households don't have access to the internet, and as many as 2.7 million adults haven't used the internet in the past three months. Lack of internet access was an issue before the Covid-19 pandemic, but it has become more critical. Here's our view of how the issue of digital poverty can be tackled.

- ["Pay the wi-fi or feed the children": Coronavirus has intensified the UK's digital divide.](#)
- [Digital poverty: 3 factors and how society can tackle it](#)

7	1. Investigate how you can use technology to reduce poverty. 2. Investigate the impact of digital poverty?
8	1. Investigate how you can use technology to reduce poverty. Should the curriculum have more focus on technology? Is this as important as maths and English? 2. Investigate the impact of digital poverty on families and its impact on Education?
